Sketch Code of C / C++

```
#include <SPI.h>
#include <MFRC522.h>
#include <Servo.h>

#define SS_PIN 10
#define RST_PIN 9
MFRC522 mfrc522(SS_PIN, RST_PIN); // Create MFRC522 instance.

Servo servoMotor;
int pos = 0;
void setup()
{
  Serial.begin(9600); // Initiate a serial communication
  SPI.begin(); // Initiate SPI bus
  mfrc522.PCD_Init(); // Initiate MFRC522
  Serial.println("Approximate your card to the reader...");
  Serial.println();
  servoMotor.attach(8);
  servoMotor.write(pos);
}
void loop()
{
  // Look for new cards
```

```

if (!mfrc522.PICC_IsNewCardPresent())
{
    return;
}
// Select one of the cards
if (!mfrc522.PICC_ReadCardSerial())
{
    return;
}
//Show UID on serial monitor
Serial.print("UID tag :");
String content = "";
byte letter;
for (byte i = 0; i < mfrc522.uid.size; i++)
{
    Serial.print(mfrc522.uid.uidByte[i] < 0x10 ? " 0" : " ");
    Serial.print(mfrc522.uid.uidByte[i], HEX);
    content.concat(String(mfrc522.uid.uidByte[i] < 0x10 ? " 0" : " "));
    content.concat(String(mfrc522.uid.uidByte[i], HEX));
}
Serial.println();
Serial.print("Message : ");
content.toUpperCase();
if (content.substring(1) == "89 36 2E 5A") //change here the UID of the card/cards that you want to give access
{
    Serial.println("Authorized access");
    Serial.println();
    delay(400);
    //Unlock by servo
    for (pos = 0; pos <= 90; pos += 11)
    {
        servoMotor.write(pos);
        delay(30);
    }
    delay(6000);
    for (pos = 90; pos >= 0; pos -= 11)
    {
        servoMotor.write(pos);
        delay(30);
    }
}

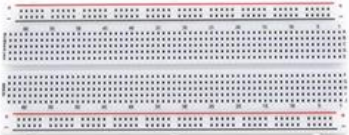

```

```

}
else
{
    return pos;
}
}

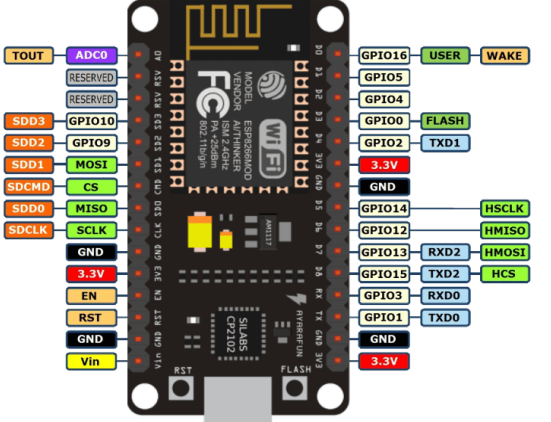

```
